**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-75 and 81-85, drawn to a method for evaluating the binding of a probe to a target molecule, classified in class 435, subclass 6.
  - II. Claims 76-80, drawn to a method for evaluating hybridization conditions, classified in class 435, subclass 6.
  - III. Claims 86-89, drawn to a computer system and computer program product, classified in class 700, subclass 11.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated methods. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are now disclosed as capable of use together and they have different modes of operation and different functions i.e. the Invention of Group I operates by comparing the binding of a probe to a target molecule wherein the probe and/or target composition is altered and functions to evaluate probe-target binding and the Invention of Group II operates by comparing the binding of a probe to a target wherein the hybridization conditions are altered and function to evaluate hybridization condition.

Inventions III and I & II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the processes for using the product as claimed can be

Art Unit: 1655

practiced with another materially different product i.e. the Inventions of Groups I and II can be practiced with manual comparisons.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Adriane Antler on 22 June 2001 to request an oral election to the above restriction requirement, but applicant requested that a written Restriction Requirement be mailed.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### **Conclusion**

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BJ Forman whose telephone number is (703) 306-5878. The examiner can normally be reached on 6:30 TO 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones can be reached on (703) 308-1152. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-8724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
